Goals of AAD consortium

PILLAR 1

Formalising science

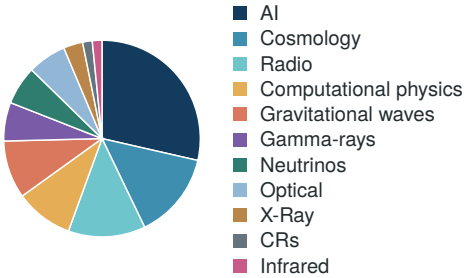

Make hypotheses, evidence and their relationships explicit.

PILLAR 2

An open-science model

Develop multimodal reasoning to discover new links within the formalism.

CONSORTIUM FIELDS

120
People

68
Institutes

13
Countries

Mailing-list estimates; field mix from the workshop survey.

General changes to the declaration

- Removed strong claims without substantial evidence.
- Adopted a neutral, measured tone.
- Added five scientific values from the consortium poll.
- Focused the arguments on preserving those values.

Time to read the draft

5 minutes

Please read the current declaration.

Theses for discussion

1. Understanding requires human participation.
2. Science cannot be reduced to verification.
3. We can and must accept genuine results without condoning their method of production.

Timeline update

Proposed next steps

2–16 November

One more revision round

Circulate the next draft, gather feedback, revise.

Before Christmas holidays

Publish the declaration

Keep signatures open on a rolling basis after publication.

Visibility Terence Tao has offered a guest spot on his blog.
